These top-quality woven textiles feature metallic yarns – containing stainless-steel, copper, enamelled copper, bronze, tin, gold and so forth – interwoven with yarns of silicone, linen, wool and other fibres. The result is a stunningly luxurious material. Made-to-order metal textiles are highly prized in the worlds of fashion and interior design. Weft yarns make the fabrics truly flexible crosswise, while warp yarns, running lengthways, give them shape memory. Maximum width: 3 metres.
